Stop Smoking Free at Last!

Recently we held another stop smoking program. Statistically speaking, only **1 – 5%** of smokers are able to kick the habit without outside help.

But the good news is, that with the method we use, „Free at Last !“ the rate of success is a whopping 40% and is therefore one of the most successful plans to stop smoking.

For details about our new stop smoking program, just go to our website and click on **Kurse/Gesundheit**. (We hope it will be in English soon)

Good-bye Cigarettes

I have smoked for almost half of my life.

I had tried to stop once before, but failed miserably. But my hopes began to revive when I heard about the program to stop smoking at Sonnmatt.

Every beginning is difficult ! But with the support of this program I was able to kick the habit! With the steam compress therapy treatments, I was able to quit with practically no withdrawal symptoms in the detoxification phase.

The exercise in the fresh mountain air, the healthy and tasty food and the good fellowship were also all a positive influence on me.

The counselling sessions and presentations were helpful as well as informative. Thus I was armed and prepared to return to my daily life.

With my own hands (and a shovel) I buried the last of my cigarettes and lighter in a small coffin and paid my last respects to my old enemy.

Now I've been smoke-free for 3 months and with God's help I will remain so. I am enjoying my life of freedom. It's so wonderful not to be controlled by cigarettes.

Elderberry-sap salve is especially helpful with joints and respiratory problems.
